It is related that a few months since a young gentlemen now residing in this city was solicited by a fair damsel, to make her a present, which he consented to do. Shortly afterward be sent her a rare surface, representing it to be of a very peculiar species and with special directions to water it frequently and occasionally expose it to the sun. Although the directions were carried out to the latter, the plant did not appear to thrive, and her friends, on testing its fragrance, declared that "pinks smelt better." At last a hap. py thought struck ihe young lady-she was certain, by digging a little around its roots that it would soon commence budding, and the beautiful flower so much wished for would surely be presented .-But on scratching away the dirt, oh, horror! "a rat dead for a ducat," natural as it was upon the day it was killed-with the exception that time had given it somewhat of a peculiar odor-with its tail painted a beautiful dark green, stiffened and kept from curling by a wire running part with it. She also parted with her friend, the presentor, for it is positively asserted that he was never again seen in the vicinity of the fair one's habitation .-Sacramento Union.
